REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art fails to teach or fairly suggest a hollow plate comprising two fused thermoplastic resin sheets with end faces of the truncated cone shaped hollow protrusions facing one another wherein a ratio between a total area of lower base portions of said hollow protrusions and an area of liner portions of the thermoplastic resin sheets is in a range from 0.3 to 0.58, wherein a rising angle of a side face of each of said hollow protrusions in a vertical plane including a central axis of the hollow protrusion is in a range from 50 degrees to 70 degrees, and wherein a bending elasticity gradient of said hollow structure plate is equal to or greater than 420 N/cm. The examiner is relying on the applicant's arguments, particularly pages 6 and 7, filed October 22, 2009 wherein a change in shape and/or size is not obvious when the claimed dimensions provide a technical advantage over the prior art as shown in Table 1 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
